### Interesting Facts

- In 1982 the US mint changed the composition of a penny from 95% copper to just 2.6% copper and 97.4% zinc to keep production costs under one cent.
- Some asphalt roofing shingles contain copper oxide granules. The biostatic properties of the copper inhibit the growth of unsightly algae.
- We're in no danger of running out of copper. Known resources are estimated at nearly 8.1 trillion pounds, of which only .75 trillion pounds or less than 10% have been mined.

### June Dates to Remember

- June 4 - ASHRAE Golf
- June 15 - Fathers Day
- June 17-19 MASMS Custodial Days
- June 26 - MN Blue Flame Golf

## FEATURED Products

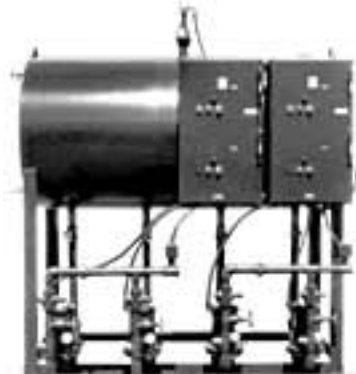

### Shipco Condensate Handling Equipment

*Condensate Returns • Boiler Feeds • Vacuum Systems • Deaerators*

Shipco has the largest selection of condensate, boiler feed, vacuum and deaerator models in the industry. They are one of the few remaining US manufacturers that both designs pumps, as well as manufactures complete, packaged units. This allows Shipco to offer custom built units for job specific applications that cannot be satisfied with standard, off the shelf products and to ensure the components of its packaged units are properly sized to work effectively and efficiently as a unit.
