Interesting Facts

- The Titanic's skipper was the most experienced captain in the company. He argued strongly for more life boats to be removed before sailing, saying it was inconceivable they would ever be used.
- The repaired Hubble Space Telescope can see 10.5 billion light years into the past, a distance that approaches the edges of the Big Bang at the beginning of the universe.
- When it was first erected the Statue of Liberty was a shiny copper color.

Schebler Stack
Alfa-Laval Water to Water Heat Exchanger

The Powerfin boilers not only heat the building, but they also heat the domestic water via the Alfa-Laval heat exchanger.

The Powerfin boilers feature the Smart System Controller as standard. This is a built in sequencing controller that provides lead/lag, outdoor reset, boiler/system pump control and many other functions.
