Interesting Facts

- While foot-long nightcrawlers can be found in North America, one specimen of South African giant earthworm measured a record shattering 22 feet.
- Night on the planet Mercury can be as cold as -280F, 1000 degrees colder than during the day. Its the greatest night to day temperature variation within our solar system.
- Barrow, Alaska, more than 300 miles north of the Arctic Circle, experiences the longest winter night of any other city in the United States; it lasts more than two months.

NEW PRODUCTS

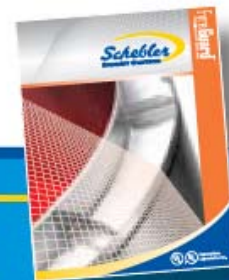

ZERO CLEARANCE GREASE DUCT - UL2221 Classified

FyreGuard grease ducts (manufactured by Schebler) offer important advantages for food service fire safety concerns. Zero clearance to combustibles, 4" insulation and a 2-hour fire rating eliminate the need for a fire-rated chase. The double wall design provides a safer and more durable exterior compared to field fabricated, wrap insulated grease ducts.

Prefabrication eliminates the need for field welding of joints. All sections are assembled with "V" bands and sealant for ease of installation. Factory provided design and CAD drawings also speed the installation process and help reduce costs. FyreGuard systems will ship within two weeks after receipt of a released order.

Let us know if your engineering or contracting firm would like to schedule a Lunch & Learn to discuss the FyreGuard grease ducts as well as Schebler's other product lines including boiler and generator stacks.
