### Interesting Facts

- Great Wall of China - Construction began in the 7th Century BC and continued until the 16th Century AD. The wall stretches for more than 4000 miles and is among the worlds greatest wonders.
- Boston's Big Dig - It took 30 years and more than \$14 Billion to complete this underground transportation network - making it the most expensive highway project in US history.
- In two years - 1959-1960 - the US built over 14000 nuclear warheads, or about 28 warheads every workday.

### Biodiesel Fired Condensing Boiler

Fulton recently completed laboratory testing of their Vantage boiler firing on biodiesel (B100) fuel. An article was published in the June 2010 edition of Boiler Systems Engineering (BSE) which is a special section in the January and June issues HPAC Engineering. Below is an excerpt.

*Biodiesel is a clean-burning fuel derived from renewable resources. It is made through a chemical process called transesterification, during which glycerin is separated from animal fat or vegetable oil. Biodiesel can be used to replace or supplement petroleum-based heating oil and diesel fuel. It can be blended with petroleum fuels and stored without significant changes to traditional industry practices, except for certain minimum tank temperatures.*

Unlike No. 2 Fuel Oil, Biodiesel does not contain sulfur. Therefore, it allows the boiler to operate in a condensing mode without the corrosion associated with Fuel Oil.

### Fulton Vantage Features

- Up to 99% Efficiency
- 5:1 Modulating Turndown
- No Minimum Return Water Temp
- No Minimum Flow Rate
- No Maximum Flow Rate
- 2, 3, 4 & 6 Million Btu/Hr
- Linkageless Controls
- Multiple Fuel Options
  - Nat Gas
  - LP
  - Nat & LP
  - #2 Fuel Oil
  - (Nat or LP) & #2 Oil

## Gas Fired Absorption Heat Pumps

The Fulton Invictus is a gas fired absorption heat pump designed for commercial hydronic and cooling applications. The Invictus captures free energy from a natural source (outdoor air, geothermal, body of water) by the use of the ammonia absorption cycle. Fulton can also provide a packaged system with heatpumps, boilers and a controller all on one skid.

### Invictus Features

- » Thermal Efficiencies up to 149%
- » Hydronic Heating and Cooling Applications
- » Air Source, Water Source & Geothermal
- » Natural Refrigerant

## Commercial Solar Thermal Systems

Lochinvar has teamed up with TiSUN GmbH to provide innovative solar thermal products to North America. They offer all the necessary components including: Flat Plate Collectors, Tanks, Pumping Stations with Controls, Expansion Tanks, Valves, Corrugated Stainless Steel Pipe and various Roof Mounts. Furthermore, Lochinvar has a solar design team ready to help size and model your complete system.
