Who's New

Matthew Kiemen

Joined Ryan in the role of Marketing/ Mechanical engineer in mid March. He lives in Minneapolis with his wife Molly. Matt is a 2008 graduate of Iowa State University. He graduated with a degree in Mechanical Engineering where he was also President of his fraternity. He comes from a background in HVAC design and energy modeling for a consulting engineering firm where he worked on many different types systems and buildings. He is a avid sports fan especially the Vikings. Contact Matthew to setup lunch and learns or with questions on design or boiler specifications. Direct: 952-767-7063 or email matt@ryancompanyinc.com

Fun Fact

A Boeing 747's wingspan is longer than the Wright brother's first plane.

More information

Visit our website for more information on any of our products. [Ryan Company website](#)

Contact Matthew Kiemen to set-up your lunch and learns now. Topic: Controlling the Boiler Room. Featuring the ModSync. Info below matt@ryancompanyinc.com

Paul Solberg

Joined Ryan as an outside sales rep in January. He lives in Maple Grove with his new wife Liz (just married Feb. 2013). Paul is a 2009 graduate of The University of St. Thomas in St. Paul. He graduated with a degree in Financial Management and also played hockey for the Tommies. He comes from a sales background in commercial staffing and machined/injection molded parts. Hobbies include hunting, fishing and golf. He will be covering Southern MN and South Dakota for the Ryan Company. Contact Paul with questions if you are located in his territory. Direct: 952-767-7068 or email: paul@ryancompanyinc.com

Featured Product: ModSync

Introducing the next generation solution for the sequencing of condensing boilers: The ModSync Sequencing System. Designed to maximize the efficiency of a multiple boiler hydronic loop, the ModSync resets the loop temperature based on outdoor temperature. Condensing boilers are staged on at low fire and remain there until all the stages have been enabled. If additional heat is required, the boilers then modulate together keeping them at the lowest firing rate possible to match the system load and maximize efficiency. These enhanced Lead/Lag capabilities are provided through an easy-to-use touchscreen interface. The ModSync's remote monitoring and text messaging capabilities provide quick access to the boiler room status.

Features and Benefits

- Lead/Lag Sequencing
- Setback Schedule
- Multiple Setpoint Control Modes
- SCADA Interface
- Alarm Status and History
- Customizable

Coming Next Month

- Updates on Lunch and Learn schedule
- Updates on Training Offered
- Featured job: **United States Post Office-Eagan** using the Fulton Vantage boilers along with the ModSync.

Fulton Vantage Features:

Up to 99% efficient on gas (Natural/LP/Digester)

Up to 88% efficient on #2 oil

Dual Fuel Capabilities

Linkageless Air/Fuel Controls

160 PSI MWP

250°F MWT

170° Max ΔT

Duplex Stainless Steel Heat Exchanger

(Highest Grade Stainless in the Market)

1" Side Clearance

Sizes available 2000, 3000 or 4000MBH Input
