Upcoming Dates to Remember

- September 2nd** - Labor Day
- September 11th** - Patriot Day
- September 22nd** - Daylight savings time
- September 24th** - Blue Flame Energy Conference
- October 2nd** - ASHRAE energy expo.
- October 2nd-4th** - MASMS Trade Show

Trivia Challenge

How many boilers were in the Air Traffic control tower job featured in last month newsletter as the job of the month?

First 5 correct answers receive a prize. Send your responses to Matthew Kiemen.

Introducing **The Endura** from **Fulton**
A New Condensing Boiler

Features:

- Condensing Hydronic Boiler
- 1500 - 2000 MBH
- Up to 95% efficiency
- No minimum return water temperature requirements
- Accessibility to components for commissioning and preventative maintenance via removable panels
- Can be incorporated into primary, variable flow piping systems and does not require the use of circulator pumps, flow switches or temperature control valves.
- Up to 8:1 turndown
- Color touchscreen display with extensive capabilities, including BMS communications and integrated sequencing for up to 8 boilers.
- Only 34" wide and 80" tall
- Requires only 1" clearance on the side

Fun Fact

The WD in WD-40 stands for Water Displacer. How many people knew that?

More information

Visit our website for more information on any of our products. [Ryan Company website](http://www.ryancompany.com)

Featured Job: St. Jude Medical Center

Mechanical Engineer: Karges-Falconbridge, Inc..
Mechanical Contractor: Horwitz Mechanical
Equipment:

- (4) Fulton Vantage Hydronic Condensing Boilers
Model # VTG5000.
- Full modulation
- Natural Gas Burners.
- Each Boiler is 5000 MBH input.
- Fulton ModSync Sequencing Controller.

Each Vantage boiler has a 5:1 turndown which equates to a 20% minimum firing rate (This 4 boiler package will provide an overall 28:1 turndown). The Fulton ModSync incorporates a true PID controller that will fire each boiler at low fire (20%) until all boilers are on and then modulate all boilers as required. This will allow the boilers to condense at a higher rate and achieve the greatest efficiency possible. We are anticipating a 20-30% annual savings as compared to standard efficiency boilers.
