February, 2014

Featured Job: Frazee - Vegas Public Schools

Mechanical Engineer: I & S Engineers & Architects Inc.
Mechanical Contractor: Overbeek Mechanical

- Equipment:
- (3) Lochinvar Crest 1500 condensing Boilers -Model FBN 1500.
 - Natural Gas Fuel
 - Each Boiler is 1,500 MBH input.
 - Modulating burner with **25:1 turndown**
 - 92% AHRI thermal efficiency
 - 99% thermal efficiency in Low temp applications
 - Direct vent flexibility to 100ft.
 - Flexible Flow Rates up to 350 GPM
 - Boilers come with SMART TOUCH operating control. Does not require a separate control system.
 - (3) Schebler CAT IV eVent SD system venting kits.

Visit our website for more information on any of our products. [Ryan Company website](#)

Shipco Pumps

Shipco® Pumps is a privately held company engaged in the design, development, production, and distribution of a wide range of engineered products grouped into six product groupings. Products are targeted for applications in the steam recovery operations of a boiler steam system. These steam-related products are primarily used, but not limited to public institutions such as hospitals, schools, colleges, universities, prisons, state buildings or military bases; as well as commercial and industrial industries such as automobile, airline, brewery, pharmaceutical, baking or shipping. Products are sold mostly within the United States, Canada, Mexico and the Caribbean through independent, manufacturer's representatives. Shipco® is one of the few, remaining U.S. manufacturers that both designs pumps, as well as manufactures complete, packaged units. This combination of capabilities enables it:

- To offer custom built units for job-specific applications that cannot be satisfied with standard, off-the-shelf products
- To ensure the components (such as receiver and pumps) of its packaged units are properly sized to work effectively and efficiently as unit

Products offered:

Since its initial years when Shipco® focused on the pump replacement market, Shipco® has become well known in the following areas of steam system products:

- Condensate Pumps
- Boiler Feed Pumps or Surge Tanks
- Vacuum Pumps and Vacuum Producers
- Atmospheric Deaerators and Pressurized Deaerators, including Two-Compartment Deaerators
- Pump and Motors Assemblies, including centrifugal, multistage, and low NPSH
- Specialty Products: Flash Tanks and Flash Recovery Vessels, Blowdown Separators, Discharge Chemical Feed Units, Glycol Fill Tank or Seal Flush Unit

Coming Next Month

- A new energy study showing the benefits of condensing boilers
- A spotlight on controls and how they are one key to energy savings
- Potentially new product information
