Located in Wyoming, Minnesota
 Mechanical Contractor: Horwitz NSI Mechanical
 Equipment:
 -(1) Lochinvar Crest FBN5000
 -(3) Lochinvar Crest FBN1500
 -(4) Security Chimney Secure Seal Stack SSD

Lochinvar Crest (FBN) is a perfect boiler for the Polaris job in Wyoming, Minnesota. Minnesota is a state where the temperature fluctuates often. In the summer the heat can climb up to 114 Degrees F and drop down to frigid air at the coldest temperatures around -60 Degrees F. During the coldest temperatures Polaris needs a boiler that can handle the temperature drop. Polaris picked the Lochinvar Crest, because it is the boiler that does the job. The Crest has combustion rates as low as 5% of the maximum firing rate up to 100% as the heating load increases. When the temperature drops into the negatives the Crest boiler is the boiler of choice.

Fun Fact

Halsey Taylor invented the drinking fountain as a tribute to his father, who succumbed to typhoid fever after drinking from a contaminated public water supply in 1896.
Show some love to your father this father's day, he deserves it!

More information

The Lochinvar Crest is an extremely efficient with average efficiency levels around 96.2%. Polaris will be saving more money with since the efficiency reduces energy usage. Along with high efficiency the boiler has smart technology to control the boiler so that operates at the most economic and fuel efficient way.

Fulton Vantage Input Sizes:

Vantage available in input sizes of:

- 2 Million BTU/HR
- 3 Million BTU/HR
- 4 Million BTU/HR
- 5 Million BTU/HR
- 6 Million BTU/HR

The Fulton Vantage Hydronic Condensing Boiler has many options for fuel and low emissions. The 3 million and 4 million boilers both have the options of being low emissions < 9 ppm NOx, VTG-3000 LE and VTG-4000 LE. The fuel options include Natural Gas, Propane, #2 Oil, Bio-Diesel and Digester Gas. To choose single fuel, dual fuel, and tri-fuel.

Along with many fuel options the boiler runs at high efficiency levels around 96.9%. The boiler features high product mass and high pressure vessel water volume, making it exceptional with unpredictable conditions. With a duplex alloy stainless steel condensing heat exchanger the boiler's heat exchanger will last extraordinarily longer.
