MODSYNC

February, 2015

## Featured Job of the Month: Lewis and Clark School

Located in Fargo, North Dakota  
 Mechanical Engineer: Obermiller Nelson Engineering  
 Mechanical Contractor: Peterson Mechanical Inc.  
 Equipment:  
 -(2) Fulton Vantage Condensing Boilers - Model VTG2000 DF  
 -Dual Fuel Burners: Natural Gas and Fuel Oil #2  
 -Each Boiler is 2000 MBH input.  
 -Fulton ModSync Sequencing Controller

The Fulton Vantage Boiler is an ideal boiler for schools due to the fact that it has many dual fuel options for its fuel source. It can handle natural gas, propane, fuel oil and even digester gas. Each Vantage boiler has a 5:1 turndown.

The ModSync has a true PID controller which will allow the boilers to fire at low fire for as long as possible which will create greater energy savings and costs savings. This can create quicker payback on your purchased equipment. We expect to see roughly 20% -30% savings on a yearly bases with this system in place.
