April 15th- Taxes Due

April 22nd - Passover Begins at Sundown

Trivia Question

List two advantages of High Mass and High Volume boilers?

First 5 correct answers will receive a prize? Please include address with your emailed answered.

Featured Job of the Month: Cedars of Edina

Located in Edina, Minnesota Mechanical Contractor: Energy Concepts. Equipment:

- -(3) Fulton Vantage VTG6000 Hot Water Boilers
- -(1) Aldrich 200BHP Boiler A3SL-5860
- -(1) Synex ModSync Boiler Management System
- -(3) Fulton Isolation Valves
- -(1) Lochinvar Shield SNR126-065 Water Heater
- -(3) Power Flame Draft Controls DC-4-MOD-AS-1200

The Fulton Vantage Boiler is an ultra-high efficiency hydronic heating. This high-mass vessel is exceptionally tolerant to a varying and occasionally unpredictable system conditions. Making the Fulton Vantage an ideal boiler for Minnesota's erractic weather. Each Vantage boiler has a 5:1 turndown which equates to a 20% minimum firing rate. The Aldrich A3SL steam boiler was choosen as a backup boiler to boost temperature on our frigid Minnesota days.

We also incorporated a ModSync to control the system and monitor certain temperatures so we able to obtain the best efficiencies as possible. The ModSync has a true PID controller which will allow the boilers to fire at low fire for as long as possible which will create greater energy savings and costs savings. This can create quicker payback on your purchased equipment. We expect to see roughly 20% - 30% savings on a yearly bases with this system in place. Some items that were monitored and/or controlled by the ModSync were as follows:

- · Controling the boiler room temperature
- Alrich Inlet Temperature
- Hydronic VFD System Pumps Controlling on Delta T (2 System Pumps)
- Aldrich VFD Boiler Pump Control

Fun Fact

The five most stolen items in a drugstore are batteries, cosmetics, film, sunglasses, and, get this, Preparation H. Apparently people are just too embarrassed to purchase the last item. And, just in case you are curious, one of Preparation H's main ingredient is shark liver oil. The oil not only helps shrink hemorrhoids, but will shrink any tissue. As a result, many older women in Florida use the stuff to help reduce the appearance of wrinkles!

Lochinvar's Newest Crest Input Sizes:

Crest now available in input sizes of:

- 750,000 BTU/HR
- 1 Million BTU/HR
- 1.25 Millions BTU/HR

EFFICIENCY With the exclusive Wave fire-tube design, advancements in Lochinvar combustion technology and the SMART TOUCH control, CREST changed how the industry thinks about fire-tube boilers. Now, three new CREST boilers, with 750,000, 1.0 million and 1.25 million Btu/hr inputs, deliver 96.2% thermal efficiency.

The system is designed to ensure smooth, quiet modulating combustion from as low as 5% of maximum firing rate up to 100% as heating load increases. And in multi-boiler applications, modulation is an essential element in cascade sequencing, which helps ensure maximum efficiency and long-term reliability.
