

## Meet our Newest Manufacturing Partner: Hurst

On behalf of everyone at Ryan Company Inc. We are very excited to add Hurst Boiler to our list of products. We look forward to the future with Hurst and expanding their brand and name across our territory.

Hurst Boiler & Welding Company, Inc. has been designing, engineering and servicing a complete line of solid fuel, solid waste, biomass, gas, coal and oil-fired steam and hot water boilers since 1967. Hurst also manufactures a

complete line of boiler room peripherals and accessories such as [blowdown separator surge tanks](#), and [pressurized feedwater tanks](#).

The product Line includes packaged boilers: 6 to 2,000 HP, pressures to 450 psi. Fire-tube, water-tube & feedwater equipment for all heating & process applications including: schools, dry cleaning, hospitals, universities, military & all commercial/industrial operations. Hurst is a custom manufacturer of engineered packaged boilers & [boiler systems](#), [biomass boiler systems](#), integrated PLC-based boiler controls & accessories. Low NOx modular boilers & burner configurations are available for all models, starting at 9.5 hp, meeting all state environmental requirements, including SCAQMD. Visit their website below for more information or Ryan Company's website as well for updates.

Ryan Company feels Hurst complements are other lines well and We are excited for the partnership. **Come see why Ryan Company Delivers Heating Solutions!!**
